

Batheaston Medical Centre News

We are proud to report that once again our clinical care scored maximum marks in the Government assessment in April. This is a measurement of the quality of both our management of a number of chronic conditions, and other areas of our service. The Government has been steadily tightening the criteria, so we are pleased with the result.

At the beginning of April we welcomed back Dr Nicola Weldon, after the birth of her baby boy last July. Dr Weldon will be working with us on Mondays. Her husband Dr Phil Weldon is working with us on four days of the week. With Dr Cathy Wernham also having a similar surname, there is potential for confusion, so take care when booking your appointment!

More patients are taking advantage of our internet prescription service to request repeat prescriptions. Please contact the staff for a registration form if you would like to take advantage of this service.

Finally, many thanks to all those who sponsored Dr Wernham in her Bath Half Marathon run for Dorothy House. She is overwhelmed by your generosity, which enabled her to raise £1,200 even before gift aid is added. Dorothy House are also very pleased!
